Sector	Agriculture, forestry and other land uses (AFOLU)
Type of Project	Forest Restoration

Project description	The Paramuno initiative was developed as part of the biodiversity, carbon, and water conservation strategies of the Cataruben Foundation, a Colombian NGO. This initiative has been supported by USAID and by 150 farmers so far, who own private lands on which they have carried out conservation activities since 2017. These properties are located in the natural high mountain ecosystems, such as paramos, wetlands, and the high Andean forest. This initiative brings together conservation under an integrated landscape approach, including productive reconversion and substitution towards more sustainable activities and ecological restoration. The total area of the initiative is 120.000 hectares. The results in avoided emissions are estimated at 350.000 tCO ₂ e. One hundred percent of the economic resources acquired by the sale of the carbon certificates will be allocated to conservation actions. Paramuno seeks to guarantee democratic participation in its implementation and administration.
Location	Departments of Arauca, Boyacá, Caldas, Casanare, Cauca, Cundinamarca, Huila, Norte de Santander, Quindío, Risaralda, Santander, Tolima and Valle del Cauca.
